## SHOW IMAGING ACQUIRES CONTOURED COMMUNICATIONS

### *Show Imaging Expands to East Coast*

Vista, CA -- Show Imaging, Inc. announced today that it has acquired Contoured Communications, a respected audio-visual firm based in Orlando, Florida. Contoured Communications will formally merge with Show Imaging on September 1, 2021.

According to Show Imaging's President, Steven Q. Evans, the company will expand Contoured Communications' existing high-quality audio-visual and production offerings to include a full slate of creative services, large-scale video mapping, custom scenic creation and full-service event and festival management. With a new and strong presence on the east coast, in particular Orlando - one of the nation's top destinations for meetings and events - Show Imaging will be able to better serve its existing customer base, while offering the complete suite of Show Imaging services to existing Contoured customers. "We are very excited to start our journey here," Evans said. "Having an established presence in Central Florida is a huge step forward for Show Imaging and its customers."

In addition to location, Contoured Communications brings to Show Imaging a solid reputation as an audio-visual industry leader. Contoured Communications was founded by industry pioneer Raymond Whittlesey, and has a legacy that Evans said will continue under the Show Imaging's name. "We are very proud of the company that Raymond built and are excited to continue to grow that legacy in this market," Evans said. Helping with that transition will be Trevor Whittlesey, as the East Coast Operations Manager. Also joining this office in a key role will be Lee Torregrossa, Director of Sales, Orlando.

Show Imaging Inc. creates unique live experiences through hands-on project management, creative design and cutting edge technology. For more than ten years, Show Imaging has brought to life nationally acclaimed events such as San Diego Comic Con, the MLB All Star Game and numerous concerts, meetings, activations and festivals around the country. Show Imaging was founded in 2009 and has quickly grown to become one of the top-rated nationally recognized production and creative companies in the industry.
